Schrader Electronics Ltd. wins contract with BMW motorcycles

Antrim, N. Ireland & Detroit, Michigan (July 2006) -- Schrader Electronics, part of Tomkins PLC, Industrial and Automotive Division, has won a new high volume business contract to supply remote tyre pressure monitoring systems ("RTPMS") to BMW Motorcycles. For Schrader Electronics, a world leader in the design and manufacture of tire pressure monitoring systems, this motorcycle system marks the latest addition to the company's RTPMS product line.

The contract provides for the supply of tyre pressure monitoring systems to twenty-five percent of BMW motorcycles starting at the end of 2006. BMW Motorcycle's long-term goal is to incorporate TPMS as a standard feature across its entire model range. This contract signals the first step towards achieving that goal. Stephen McClelland, Managing Director commented: "Schrader Electronics proven track record in tire pressure monitoring technology coupled with over eight years experience in the market place has given us a leading edge over heavy competition. We are delighted to have won this contract in what is a crucial segment of the market."

About Schrader Electronics

Schrader Electronics is a provider of automotive electronics solutions and is the market and technology leader in remote tire pressure monitoring systems (RTPMS). The system allows drivers to monitor their vehicle's tire pressures by using electronic sensors attached to the tire valves to transmit pressure data from each wheel to displays on the dashboard or rear view mirror. Schrader Electronics' customers include GM, Ford, DaimlerChrysler, Nissan, PSA and Renault. For more information about Schrader Electronics, go to
